Education

Mount San Antonio College

Data Science Transfer

Jun. 2024 – Jun 2026

Walnut, California

University of San Diego

B.S in Data Science (Expected graduation Jun. 2026)

Sep. 2026 – Jun 2028

La Jolla, California

Relevant Coursework

- Data Structures and Algorithms, C++ OOP, Statistics and Probability, Multi-Variable Calculus, Linear Algebra, Differential Equations, Discrete Mathematics, Physics Mechanics, Java OOP

Experience

Mt San Antonio College Computer Science Club

Workshop Officer

Aug. 2025 – Jun. 2026

Walnut, CA

- Plan and host student events and workshops to help students learn about computer science and connect with classmates.
- Build the CS Club webpage using React, TypeScript, HTML, and CSS to share club information, events, and resources.

Mt San Antonio College HSR Program

Math tutor

Jun. 2025 – Jul. 2025

Walnut, CA

- Tutored students in Integrated Math 1 through Integrated Math 3 by explaining concepts in simple steps and guiding them through practice problems.
- Assisted instructors with grading assignments to support classroom progress and give students timely feedback.
- Helped students during tutoring sessions by answering questions, reviewing homework, and improving their problem-solving skills.

StemForOthers

Course Developer

Jan. 2025 – Jun. 2025

Walnut, CA

- Designed an intermediate Java course to help students strengthen programming skills through structured lessons.
- Created slides and interactive coding problems to help learners practice Java concepts and apply them to real examples.
- Developed course materials that explain programming topics clearly and make learning easier for beginner and intermediate students.

Projects

Mt.Sac Computer Science Club Website | *React, TypeScript, Html/CSS*

Jul.2025

- Built a front-end website for the Mt SAC Computer Science Club using React, TypeScript, and Tailwind CSS to share club information with students.
- Developed reusable components for officer profiles, advisor profiles, events, and contact pages to keep the website organized and easy to update.

Smart Classroom | *Html/CSS, TypeScript, React, Python, Genai*

Oct. 2025

- Used React and Typescript to develop the application structure and connect the user interface with backend features.
- Implemented Python backend logic to process syllabus content and generate organized classroom modules.
- Integrated GenAI features to help extract course topics, assignments, and schedule details from uploaded syllabus.

Technical Skills

Languages: Java, Python, C++, TypeScript, HTML/CSS

Technologies/Frameworks: GitHub, JUnit, React, Next.js
